Our loyal shoppers love to get quality used items that fit their needs. At the same time they enjoy the lower

cost while saving the environment by recycling

items that don't belong in the landfill. If it is too good to be thrown away, bring it to us to pass on to a new happy owner. We are different in our products but quite the same in the way consignment shops work.

Both Men and Women love to shop at Men's Exchange. Our variety changes every week with hundreds of treasures arriving at our back door and going home with happy new owners out the front door. Shoppers make it a point to do their weekly walk thru.

Welcome to Men's Exchange™.

Men's Exchange is the answer to yard sales, internet exposure, downsizing, moving and anything else that helps you easily sell your items. We use all the tools of marketing to help local buyers find your goods. We re-sell many categories of items including tools, electronics, musical instruments, art, appliances and more.

Buy great used tools instead of new. No production pollution, no foreign debt, no wasted energy to produce and a much better product often American Made. And you save money!

Help us spread the word by posting our flyer or brochure at work, retirement homes or local grocery store.

A copy of our flyer is available on our web site.

This brochure is also available in PDF form on our website at

## What To Consign

If you are downsizing or moving we can be a great help.

Great tools and guy stuff in working order are our main categories

Tools, Sporting Equipment, Construction Grade Tools for Automotive, Carpentry and all trades, the tools and machines needed to maintain the household and property, men's jewelry including watches and other accessories and of course home workshops.

## Four Seasons

Our shoppers buy on impulse and we carry items by the season; we need lawn mowers in the summer, snow blowers in the winter. We limit furniture to smaller pieces and items that go in a bar area, rec room. Exercise equipment is limited to certain categories.

## Big Items

Call us to discuss large lots or large items. We can easily handle complete workshops and large machinery. If you have to urgently clear out we can manage it for you. We have trucks and movers to handle your consignment.

## Two Goods

Recycle and donate to charity—ask us how.

Ask about our quick cash program.
